### About this Learning Opportunity

All teachers ask questions every day. Literally hundreds of them. How, when, and what questions are posed is critical. This session will be packed with relevant, useful, and proven strategies that anyone can implement immediately. Teachers, instructional coaches and administrators will benefit from the concrete take aways about being intentional with instructional decisions. Your learning can be used in your online learning sessions tomorrow. Questions are the driving force of learning. Dig into framing, delivering and maximizing questions in your education space to keep students engaged in thinking and learning.

### About the Facilitator(s)

**Connie Hamilton** is the author of Hacking Questions. She has been a teacher, instructional coach, principal, and district leader in her 20+ years in education. Connie models the same strategies in her workshops that she encourages teachers to use in their classrooms. Her message is clear, realistic, and relevant to educators across grade levels and content areas.?
