

Math Activities to Support Learning From Home - Grades 1 & 2

Facilitator(s):	Renée Michaud
Date(s):	<i>This is a multi-day event.</i> <ul style="list-style-type: none">• Day 1: Apr 29, 2020 (9:00 AM - 10:00 AM)• Day 2: May 06, 2020 (9:00 AM - 10:00 AM)• Day 3: May 13, 2020 (9:00 AM - 10:00 AM)• Day 4: May 20, 2020 (9:00 AM - 10:00 AM)
Cost:	No charge
Location:	Virtual
Session Code:	20-MA-340

About this Learning Opportunity

A few weeks ago, you were asked to stay home. You were also asked to offer at-home learning opportunities for an indefinite period of time. For many of us, it can be daunting. The purpose of this workshop is to help you. This series of 4 sessions will provide you with engaging math activities that can be done at home. The activities you will see are either directly linked to your grade-level learning outcomes (Alberta Program of Studies) or help promote the development of one or more mathematical processes. They will vary in nature and format (paper/pencil, online) but they will all be flexible enough for you to differentiate when needed.

About the Facilitator(s)

Renée Michaud is a consultant in mathematics. She has been developing her sessions in both languages and presenting them throughout Alberta and beyond for more than a decade. Her practical approach in a workshop situation and her great knowledge in mathematics make her a sought-after presenter. Renée taught French immersion in Calgary for over 20 years. She is a graduate of Campus St-Jean, U of A.
