About this Learning Opportunity

Join our interactive session of our top 10 numeracy activities for the preschool and kindergarten classroom. These activities are easy to implement, cross-curricular, low-cost, and fun! And you will be able to use them in the classroom the next day.

Why is this session relevant to teachers?

Why this is an important session: It provides teachers with activities to facilitate numeracy in their classroom.

What will be the learning: Easy, low cost, fun, cross-curricular numeracy activities.

Focus: Numeracy concepts.

Takeaway: Numeracy activities to use in the classroom.

Alberta Curriculum Alignment: Kindergarten (Learning outcomes: Children identify quantity to 10 and Children interpret compositions of quantities within 10).

About the Facilitator(s)

Angela Hanson

Angela Hanson is an elementary school educator who believes that learning math concepts should be active and fun. She structures math classes that encourage students to move and engage in group activities. Her students are excited to discover new math strategies using manipulatives and games. She enjoys outdoor adventures, sudoku, and baking.
